

# STAY WORKING. STAY PRODUCTIVE. STAY ON!TRACK.

## The problem

These problems slow you down:

- Expired Certifications
- Lapsed Maintenance
- Broken tools
- Missing assets

They cost you money, be it fines, lost hours, or duplicated purchases. How often do you encounter them? Weekly? Daily? Hourly?

Managing hundreds, if not thousands of assets across multiple job sites is not easy. A lot of systems utilized in the field today are no more advanced than a whiteboard, filing cabinet, or maybe a spreadsheet.

Partner with Hilti and let us lead you into the digital age. Our specially trained field team members will visit your jobsites and offices and build a solution suited to your asset management needs. Leaving you the time to take care of business.

## What is ON!Track and how does it work?

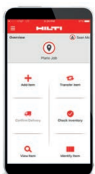

Hilti ON!Track is the professional solution for the management of all your assets. With Hilti ON!Track you will always know what assets you have, where they are, their condition and their responsible employee. Hilti ON!Track also helps you track the history of your assets and to proactively manage and document repairs and inspections.

- **Hardware:** robust barcode tags – can be applied to any type of equipment you have and want to track (not exclusive to Hilti)
- **Software:** easy to use, cloud-based and free smartphone app (iOS and Android) with unlimited users
- **Service:** onsite consultation, development of individual solution, full implementation with data upload and asset tagging, onsite training and nevertheless best in class, free customer support

The benefits to you:

- Full transparency and accountability across your business
- Cost savings through optimised use of your equipment and less duplication of purchases
- Time savings due to more digitalised processes and less administrative effort
- Important inspection and maintenance reminders
- Location of your equipment available at any time from anywhere
- Automatic software updates and unlimited support from our specialised team

## Our ON!Track solution

### Mobile App

With the ON!Track app, you always have at hand an overview of your equipment, documents and maintenance schedules, linked to the person responsible.

### QR tag

All your equipment is marked with robust QR tags designed for harsh jobsite conditions. Simply scan the tags with your smartphone or a scanner to load your assets into the software.

### Online software

The ON!Track online software makes it easy to create, manage and locate your assets.

# FIVE STEPS FOR EFFICIENT EQUIPMENT MANAGEMENT

## Step 1: Consultation and analysis of your current situation

Introducing a new system for managing equipment is a major decision. Your ON!Track Field Specialist will start by carrying out a comprehensive analysis of your business processes, existing equipment and your potential savings.

## Step 2: Developing a tailor-made solution

Based on the information gathered during the site analysis, our team will build customised software that meets all your business needs.

## Step 3: Implementing ON!Track at your company

The Hilti team helps you provide all your equipment with a robust label and then register it into the system. The cloud-based solution does not need to be installed on your computer. After logging in, the data can be immediately accessed at any time via web browser and is always up to date. Thanks to our user-friendly smart-phone app, which you simply install on your mobile device, you can also retrieve all necessary information on-the-go.

## Step 4: Employee training

Hilti's experts conduct a comprehensive training session that you and your employees learn all the functions of the ON!Track web and mobile app, and how to use them best.

## Step 5: Let's get started!

You can now start working with ON!Track! For your business, this means: more efficient and transparent processes, lower costs, and a better overview of where your equipment is located. You'll also receive reliable information on which devices are in use or being repaired. With accurate data, you'll be able to optimize their workload.
